

DENNIS JOSEPH

Python Full-Stack Developer

Kozhikode, Kerala · +91 8301924243 · dennisjoseph2025@gmail.com · [GitHub](#) · [LinkedIn](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Python Backend Developer with full-stack capability, specialising in building and deploying production-ready APIs and web systems using **Django**, **Django REST Framework**, and **PostgreSQL**. Recently built **PyDocAI** — an AI-powered SaaS platform on **AWS** (EC2, RDS, ElastiCache, S3) with an async **Celery** pipeline and **Groq LLM** integration. Comfortable owning the frontend (**React**) when the project calls for it. Skilled in **JWT auth**, **RBAC**, **Docker**, and **CI/CD** pipelines. C1 Advanced English proficiency (EF SET Certified).

TECHNICAL SKILLS

Backend	Python , Django 5/6, DRF , SimpleJWT, PostgreSQL , Django ORM, Celery , Redis , PgBouncer, Gunicorn
Frontend	React.js (Vite), TypeScript , Redux Toolkit, React Context API, Tailwind CSS, Bootstrap, JavaScript (ES6+)
AI / LLM	Groq (LLaMA-3.3-70B); Python AST parsing for code analysis and cross-reference extraction
Cloud & Infra	AWS (EC2, RDS, ElastiCache, S3, IAM, CloudFront), Docker Compose (dev/prod), Vercel, DuckDNS
CI/CD & Tools	GitHub Actions , GitHub OAuth, Google OAuth, uv, Ruff, pytest , drf-spectacular (Swagger /OpenAPI)

PROFESSIONAL EXPERIENCE

Software Developer · Bridgeon Solutions, Calicut Aug 2025 – Present

- Built and deployed **PyDocAI**, an AI-powered SaaS documentation generator using **Django**, **Celery**, **Groq LLM**, and **React** on **AWS** (EC2, RDS, ElastiCache, S3, CloudFront) with a full **CI/CD** pipeline.
- Developed REST APIs with **Django REST Framework**, **JWT** authentication, **RBAC**, and **GitHub OAuth** / Google OAuth integration.
- Collaborated via **Git** branching, pull requests, and code reviews; practised Agile delivery with iterative feature releases.

PROJECTS

PyDocAI — AI-Powered Python Documentation Generator (Full-Stack SaaS)

Live: <https://pydocai.vercel.app> GitHub
Stack: **Django 5.2**, **DRF**, **Celery**, **Redis**, **PostgreSQL**, **React 19** + **TypeScript** + **Vite** + **Tailwind**, **Groq API**, **Docker**, **GitHub Actions**, **AWS** (EC2, RDS, ElastiCache, S3, CloudFront)

- AI SaaS accepting Python files, ZIPs, and GitHub repos; parses code with **AST**, generates Markdown docs with Mermaid diagrams and syntax highlighting.
- Async generation via **Celery** with rate limiting (5 req/min), exponential-backoff retries, and **Groq LLM** mock-docs fallback for graceful degradation.
- Full **CI/CD** pipeline (Ruff → pytest → Docker → GHCR → SSH deploy); dual Compose configs for dev (SQLite + local Redis) and prod (**AWS** RDS + ElastiCache + S3).
- GitHub OAuth** sign-in and repo import; **JWT** auto-refresh; custom **AST** parser feeds structured metadata (classes, decorators, type hints) to the LLM.

DENJO-C — E-Commerce Platform (Full-Stack)

Live: <https://denjo-c.vercel.app> GitHub

- React + Vite frontend with **Django 6** / **DRF** + **PostgreSQL** backend; **JWT** auth with token blacklisting and 3-tier **RBAC** via custom DRF permission classes.
- Product catalog with Category → SubCategory & size variants; cart and checkout with stock validation; admin analytics via **ORM** aggregations + **Swagger UI**.
- Modular Django app structure separating authentication, admin-side (products, stats), and user-side (cart, orders); full-text search with **Q queries** and paginated listings.

EduCom — Student Management Platform (Full-Stack)

Live: <https://student-management-django-omega.vercel.app> GitHub

- Full-stack **Django** app (templates + ORM + **PostgreSQL**) with session auth and **RBAC** for student/principal roles; Bootstrap dashboards deployed to Vercel.
- Normalised relational schema with optimised queries across multiple related tables; consistent uptime in production via **Gunicorn** on Vercel.

EDUCATION

B.Com in Computer Applications — BVM Holy Cross College, MG University 2022 – 2025
